

## Leadership Challenge - Seminar

This seminar is designed for every Church member to understand and apply the five key practices of leadership. This seminar is based on the book *The Leadership Challenge* by Kouses and Posner.

### Topics Covered

- Five key practices of effective leadership
- Group activities to understand and apply these practices

### Benefits

- Promotes leadership at all levels
- Better performing teams
- Develop leaders in the organization
- Renewed commitment to the vision of the organization
- Leaders will have positive influence on everyone in the organization

This seminar is presented by **The Potter's Ministries**.

**Logistics:** This 3 hour seminar can be organized at your Church facility or a neutral site. Contact Cyril Rayan at 408-568-2597. This can also be a one day workshop with experiential leadership and team building activities.

### Facilitator:

Cyril has been walking with the Lord since 1992. He has been a Church elder for 3 years and also Director for the Church building project for 2 years at Christ Church of India. Cyril Rayan is currently President & CEO of Mindbrook Inc. and has twelve years experience in the semiconductor/software industry. He has more than 7 years experience in International marketing and sales. In his last position he was a worldwide product manager at ZiLOG, Inc. He is an Associate Professor at Bethany University where he teaches marketing, leadership and management courses. He is an adjunct professor at William Jessup University, where he teaches leadership courses. He is an adjunct professor at University of Phoenix where he teaches marketing courses. He conducts a weekly Bible Study and shares God's word wherever the Lord opens doors. He is a Co-founder of the Potter's Ministries and the Christian open development network, which is an open source movement in the Christian community for software projects. He is a strong intercessor and leads the "Pray For the Nations" event for The Potter's Ministries. He holds a master's degree in Electrical Engineering and an MBA from Santa Clara University.
